

ULSTER

The bull of choice for muscular development, Ulster also has a pedigree with less known ancestors. The performance on farm of his dam and his paternal grandmother guarantees the transmission of a good milking ability. His weaning index places him in the leaders of the breed as does evidence of his production so far. MH/+.

Sire: Occitan, Grand-sire: Jockey

IFNAIS	91	Calving ease
CRSEV	108	Growth capacity
DMSEV	121	Muscular development
